ABOUT ME:

Frontend Engineer with nearly a decade of experience in designing complex web applications. I combine deep technical knowledge—from microfrontend architecture (Module Federation) and state management to containerization and CI/CD processes. I also have experience in the Salesforce and Veeva ecosystems. Focused on high-quality code, software delivery automation, and building scalable solutions that deliver real business value.

KEY ACHIEVEMENTS:

- Improved application performance through code splitting, lazy loading, and bundle optimization
- Migrated from JavaScript to TypeScript (+50K lines of code), enhancing system maintainability and reducing runtime errors
- Reduced production errors by implementing strict code reviews, ESLint rules, and pull request standards
- Increased team productivity by standardizing project structure and creating reusable components
- Delivered platforms integrated with CRM systems (Salesforce, Veeva) for enterprise clients
- Architected and implemented a Micro-frontend solution (Module Federation)

SKILLS:

React, TypeScript, JavaScript (ES6+), Next.js, Redux, Tanstack Query, Node.js, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, REST API, GraphQL, Git, Webpack, Docker, CI/CD, ESLint, Prettier, Jira, Postman, Salesforce, Veeva CRM, Microfrontends (Module Federation – personal project), React Native (personal project)

EXPERIENCE:

Frontend Engineer 2022 - present

Ostendi Global Sp. z o.o. (Warsaw)

- Designing and developing HR platform features using React and TypeScript in an Agile environment
- Refactoring the legacy codebase, resulting in improved performance (approximately 30% faster load times) and reduced technical debt
- Taking responsibility for frontend architectural decisions for new modules (component structure, state management)
- Integrating complex REST APIs and ensuring reliable data flow between services
- Conducting code reviews and maintaining coding standards
- Collaborating with backend, QA teams, and product stakeholders to deliver end-to-end functionality

Tech Stack: React, JavaScript, TypeScript, Redux, Tanstack Query, GraphQL, Node.js.

Tools & UI: SCSS, Bootstrap, REST API, Webpack, Docker, Postman, ESLint, CI/CD (GitLab), Jira.

Mid Frontend Developer 2020 - 2022

Wavy Apps / Brightforce Sp. z o.o. (Warsaw)

- Developing and maintaining scalable web applications for real estate and sales automation platforms
- Integrating the frontend layer with Salesforce CRM and external APIs
- Delivering solutions based on Veeva CRM and Veeva Vault for enterprise clients
- Optimizing existing legacy modules, leading to improved system stability and performance

Tech Stack: JavaScript, Apex, SOQL, HTML5, CSS3, REST API.

Tools & UI: Salesforce, Veeva CRM, Bitbucket, Jira.

Junior Frontend Developer 2016 -2017

Frontend Developer 2017 -2020

Active Pharma Sp. z o.o (Warsaw)

- Developing web applications and interactive marketing tools for pharmaceutical clients (GSK, Pfizer, Takeda, Adamed, Johnson & Johnson)
- Building reusable UI components and enhancing consistency across projects
- Integrating applications with Salesforce and Veeva CRM systems
- Collaborating directly with business stakeholders to translate requirements into functional features

Tech Stack: JavaScript, HTML5, CSS3, Node.js, Bootstrap.

Tools & Ecosystem: Salesforce, Veeva CRM, WordPress, Git.

Electronics Engineer / Deputy Branch Manager – Grodno Region 2011 -2015

Tusson Ltd, Belarus

- Maintaining and servicing ATMs and payment terminals for financial institutions
 - Diagnosing and repairing electronic systems in compliance with strict SLAs
 - Coordinating the technical team's work (leadership responsibilities)
 - Collaborating with banks and enterprise clients
-

EDUCATION:

Master's degree in Electronics

Yanka Kupala State University: 2001 - 2006, *Grodno*

courses & professional development:

Programming Course – GoWork (2016)

Online trainings: JavaScript, React, TypeScript, Next.js, Node.js, Docker, Git

LANGUAGES:

Polish - Fluent

English - B1

Belarusian - Native

Russian- Native
